● **GKD METAL FABRICS TIGRIS PC FENCE**

Metal fabrics are functional materials for landscapes, and can be used as sunshades and canopies, bridge railings, gates, and fences. GKD metal fabrics and attachment systems are made of noncorroding high-grade AISI Type 316 stainless steel, making them durable and easy to maintain. At the Chicago Art Institute, walkways are flanked by fences made from GKD's Tigris PC metal fabric, with the tops of the panels disappearing cleanly into a wooden handrail, juxtaposing wood and stainless steel. ●
