Weaves: Sambesi

Attachment: Flat and Angle with Threaded Rod

Architect: Pfieffer Partners

Application: Interior

Subsection: Covering, Partitions

Location: Los Angeles, California

Market Segment: Education

DESCRIPTION

For this campus gym, flexible metal fabric allowed designers to create a curved wall that reaches to the upper level, finishing as a balustrade for the railing system. The tensioned fabric defines the large area on the ground floor while keeping outside light flowing to the interior.
