Minutes from Boston, Brookline is consistently ranked as the best suburb in the nation, and nestled in the heart of town is The Brookline Place, a redevelopment project consisting of outdoor public spaces, medical offices and mixed retail, and the 6-story, 683 space Brookline Place Garage.

Striving for a subdued and environmentally-integrated design, the garage is distinct in its ability to blend into the surrounding landscape, while providing a touch of understated elegance to what could have otherwise been designed as an afterthought.

GKD-USA worked with the architects to create a custom version of our popular Tigris metal fabric to complete their vision.
