metalfabrics@gkdusa.com

Located strategically outside the two-story public wing of the California ISO Headquarters in Folsom California, GKD metal fabric Omega 1510 provides solar control and daylighting for this west facing area . The metal facade aesthetically functions as a medium to filter direct sunlight, keeping it from overpowering the interior.

Case Study

Applications

Solar Mesh

Transparent Metal Mesh Facades

Metal Fabrics

Omega 1510

System Components

Extended loop - eyebolts
