Houston Area Safety Council Occupational Health Center gets solar control and graphic visuals from the custom etched Omega 1510 metal fabric from GKD. Extended loops on the fabrics allow stainless steel flats to be inserted. These in turn, are connected to the clevis that. Panels are tensioned top and bottom by bolts on the threaded rods.

**Applications**

Solar Mesh

Transparent Metal Mesh Facades

Etched Surfaces

**Metal Fabrics**

Omega 1510

**System Components**

Reinforced internal flat bar
