

**Location**

Utrecht, Netherlands

**Project Type**

Corporate Buildings

**Architect**

Ellen Sander

GKD metal fabrics are used throughout this media center. At the entrance Omega is used to create a tunnel-like passage to the reception area. It's also used as ceiling panels to hide building utilities while still leaving the ceiling semi-transparent. Used for wall partitions and vaulted ceilings, Omega masks and reveals simultaneously. Used as wrap around the bases of custom lighting columns, Sambesi becomes a delicate sleeve that glows from within.
