The Pasarela del Arganzuela footbridge features tapering conical forms of shimmering stainless steel Escale metal fabric. The transparent metal mesh surrounds the bridge from end to end in a helix design like a textile ribbon. This helix, which gleams silver in the sunlight, is a metaphor for the increasingly close association between the two parts of the city separated by the river Manzanares.

Case Study

Applications

Transparent Metal Mesh Facades
 Specialty Metal Mesh Architectural Adornments

Metal Fabrics

Escale 7 x 1

System Components

Eyebolt
