The best World Fairs have served as seedbeds for innovation. The Hanover, Germany 2000 World Fair was among the best, and featured the architectural highlight of Bertelsmann Spaceship, Planet M: a remarkable ovoid-shaped building clad in Escale stainless steel fabric. In the daytime, the light-reflecting skin glistens, and in the evening the building glows from within as the mesh recedes into the night.

Applications

Solar Mesh

Facades

Transparent Metal Mesh Facades

Metal Fabrics

Escale 7 x 1

System Components

Eyebolt
