Stainless steel façade sun protection by GKD makes a significant contribution to the sustainable building concept, keeping the building heat gain under control while filtering light for optimal natural lighting utility. This new TCA headquarters was constructed to LEED platinum levels, using solar cells and ground temperature heating and cooling systems as well. GKD's Omega 1510, 1520 and 1530 metal fabrics were used to accomplish the solar control and provide the aesthetic presentation.

Applications

Solar Mesh

Transparent Metal Mesh Façade

Metal Fabrics

Omega 1510

Omega 1520

Omega 1530
