metalfabrics@gkdusa.com

The perfect location to get the word out to students and faculty is on the approach James Branch Cabell at Virginia Commonwealth University. So, Mediamesh® was chosen to project the digital graphics and messaging on a constant basis. It was important also to provide transparency from the inside and to filter the most intense light of the day. All missions accomplished.

Applications

Solar Mesh

Facades

Mediamesh®

Metal Fabrics

Mediamesh® V4xH5.0

System Components

WIB - eyebolts top and bottom
