Omega 1520 fabric provides the solar management solution for these offices, mitigating the intense southwest sun. Sunshade screens also provide privacy from plaza crowds below while remaining transparent to the view out. Additionally, Omega 1520 is the backdrop to movable LED boards along the plaza. Special sliding gates were designed and supplied by GKD to allow maintenance access to the video boards.

Applications

Solar Mesh

Transparent Metal Mesh Facades

Metal Fabrics

Omega 1520

System Components

Eyebolt

WIB - eyebolts top and bottom
