

# Flat & angle

GKD BIM models and more at:

The fabric is clamped by the flat and angled bars with a threaded rod welded to the angle bar for tensioning via turnbuckles or nuts. Other bar profiles may be considered based on the desired appearance. This method is frequently used for interior partitioning and multi-level stairwell balustrade partitions.

### Applications

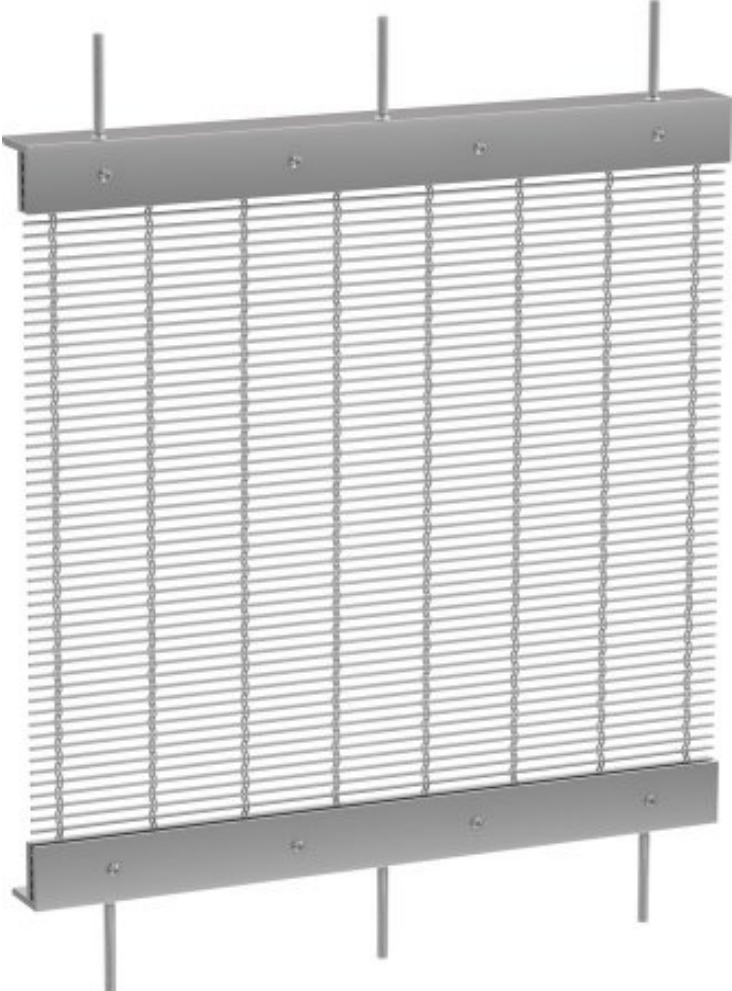

- Metal Mesh Wall Coverings
- Metal Mesh Ceiling Panels
- Safety and Security Partitions

### Metal Fabrics
