

GKD BIM models and more at:

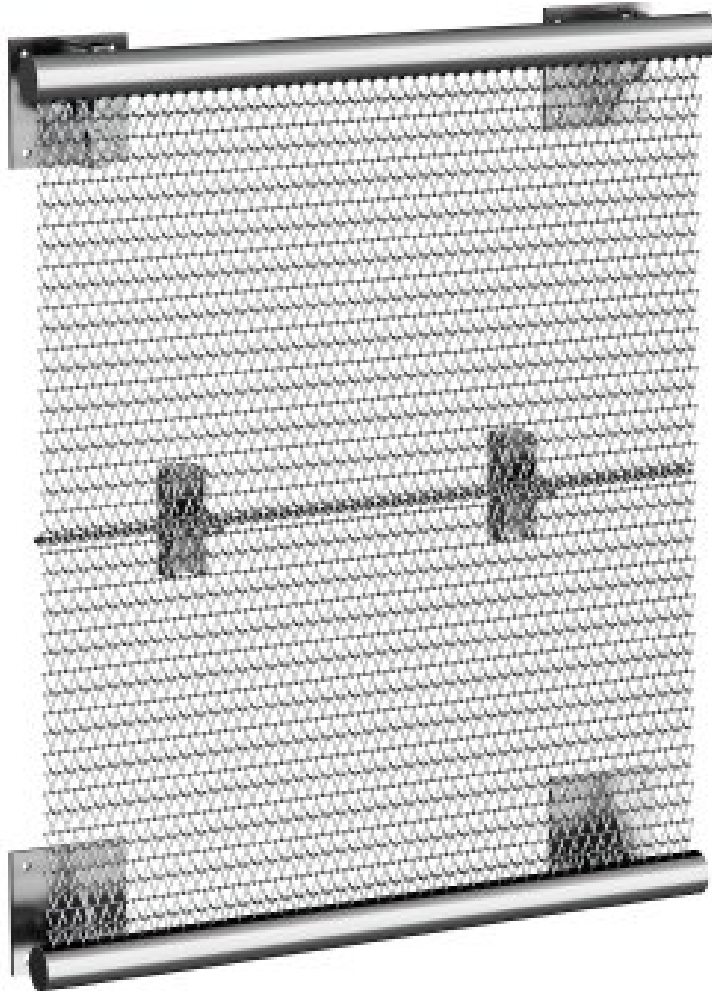

With the StealthLok™ system, the metal fabric ends terminate within cylindrical shrouds after passing through a defined envelope. Within the cylinder is a bar which acts to permanently secure the fabric. Tensioning is accomplished mechanically from the top and bottom brackets. Visually, the means of attachment remains a mystery.

Applications

Solar Mesh
Parking Facades
Transparent Metal Mesh Facades
Etched Surfaces

Metal Fabrics

Chesapeake
Helix 12
Helix 48
Lago
Omega 1500
Omega 1520
Omega 1550
Sambesi
Futura 3110
Helix 24
Helix 72
Lamelle
Omega 1510
Omega 1530
Omega Divergence
Tigris
