

GKD BIM models and more at:

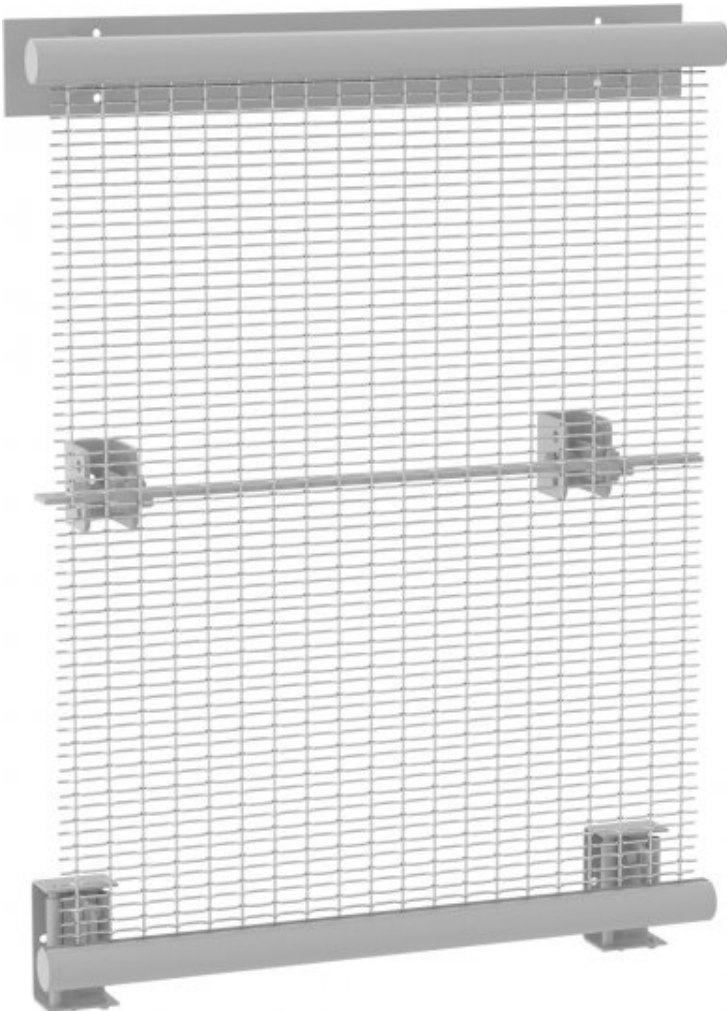

This is the spring tensioned version of the hidden attachment StealthLok™ system. The metal fabric ends terminate within cylindrical shrouds after passing through a defined envelope. Within the cylinder is a bar which acts to permanently secure the fabric. Tensioning is accomplished with a hidden spring system at the bottom. Visually, the means of attachment remains a mystery.

Applications

Solar Mesh
Parking Facades
Transparent Metal Mesh Facades
Etched Surfaces

Metal Fabrics

Chesapeake	Futura 3110
Helix 12	Helix 24
Helix 48	Helix 72
Lago	Lamelle
Omega 1500	Omega 1510
Omega 1520	Omega 1530
Omega 1550	Omega Divergence
Sambesi	Tigris
