DESCRIPTION

This proprietary composite includes a mesh surface layer, an aluminum honeycomb supporting plate and an intermediate layer consisting of acoustic fleece. Acoustic Mesh Panels enable the design of precisely formed, sag-free ceilings with acoustic benefits.

PRODUCT SPECIFICATIONS

Material: Aluminium
Type: Rigid
Open Area: N/A
Weight: 1.0 psf
Max Width: 4'

APPLICATIONS

- Partitions
- Acoustic Mesh Panels
- Acoustics (AMP)
- Ceilings

PROJECTS

Baden-Württemberg Ministries Building, Museum of the Bible, Tour Europlaza, Hohenheim, European Organization for the Exploitation of Meteorological Satellites (EUMETSAT)
