metalfabrics@gkdusa.com

Weaves: Tigris

Attachment: Woven-In-Bar with Hook Brackets
& Springs

Architect: Sweco Architects

Application: Facades

Location: Oestersund, Sweden

Market Segment: Civil

DESCRIPTION

This 215-foot high structure, wrapped in an almond-shaped, energy-efficient veil of stainless steel metal fabric, stands on a hill above the Å-stersund. LjusDesign illuminated the tower with a design inspired by Arcturus, the "provincial star" of JÃmtland, which is projected onto the metal fabric by LED fixtures.
