Weaves: Escale 7×1

Attachment: Eyebolts

Architect: B4FS Arquitectos

Application: Interior

Subsection: Partitions, Covering

Location: Buenos Aires, Argentina

Market Segment: Municipal

DESCRIPTION

The main attraction of the Centro Cultural Kirchner building is a concert hall within its curved center. The colossal construction has a fascinating visual effect due to its shimmering Escale metal fabric skin, which seamlessly covers the ellipsoidal body and reflects the blue of the surrounding walls and skirting.
