metalfabrics@gkdusa.com

Weaves: Baltic

Attachment: Fusiomesh NG - Cable Mesh

Architect: Avanto Architects

Application: Facades, Solar Control

Location: Vantaa, Finland

Market Segment: Spiritual

DESCRIPTION

A vision to preserve the 15th century design of the Chapel of St. Lawrence led to a striking design and a unique application of metal fabrics. The architects chose bronze GKD mesh to finish the ceilings, walls and the glazed facade, which was then hand painted in a classic green.
