metalfabrics@gkdusa.com

Weaves: Omega 1510

Attachment: Outrigger Tension System, Extended
Loops with Eyebolts

Architect: Lord Aeck & Sargent

Application: Facades

Location: Ypsilanti, Michigan

Market Segment: Education

DESCRIPTION

Spanning this science building facade is an energy efficient sunshade. An outrigger attachment system uses top and bottom arms as the primary anchors while smaller intermediate supports stabilize at every floor plate. The result is multi-level energy efficiency, sustainability and transparency.
