metalfabrics@gkdusa.com

Weaves: Omega 226

Attachment: Flat & Angle Frame

Architect: Talleres Valeriano Monton

Application: Solar Control

Location: Barcelona, Spain

Market Segment: Multifamily

DESCRIPTION

Sliding shutters composed of Omega 226 mesh stretch across individual frames, providing the ability for natural light to flow into the structure by shifting the shutters open. During the hottest part of the day, the building enjoys solar protection by simply closing them again.
