DESCRIPTION

The Lawrence Group wanted the new St. Louis Federal Reserve building to make its mark in the Gateway City to the West but needed practical benefits like natural lighting and sunshading. They chose GKD Sambesi mesh to envelope the building giving it a modern look and unobstructed views to the outside.

Weaves: Sambesi

Attachment: Woven-In-Bar with Hook Brackets
& Springs

Architect: The Lawrence Group

Application: Facades, Solar Control

Location: St. Louis, Missouri

Market Segment: Municipal
