Weaves: Tigris

Attachment: Woven-In-Bar with Eyebolts Top &
Bottom

Architect: Perkins and Will

Application: Safety and Security

Subsection: Railing, Enclosures

Location: Burnaby, Canada

Market Segment: Civil

DESCRIPTION

Stainless steel mesh offers safety and protection while ensuring visual transparency. The design includes a single arch that stretches diagonally across the bridge and connects to the supporting structure. Mesh panels curving toward the center provide fall guard protection and shield pedestrians from wind gusts.
