Weaves: Omega 226, Acoustic Mesh Panels

Attachment: Torsion Spring

Architect: Patzner Architekten

Application: Acoustics, Interior

Subsection: Ceilings

Location: Stuttgart, Germany

Market Segment: Municipal

DESCRIPTION

The multi-purpose event hall designed by Patzner Architekten needed a sound-absorbing acoustic ceiling option that aesthetically melded into their vision. They turned to GKD to create a ceiling system from CMP ALU 6010 weave that then clamps onto the existing ceiling wall.
