Weaves: Omega 1530

Architect: UTE Sagasta

Application: Facades, Interior, Safety and Security

Subsection: Partitions

Location: Logrono

Market Segment: Corporate, Education, Healthcare,
Hospitality, Retail, Transportation

DESCRIPTION

A secondary school in Spain, I.E.S. Sagasta, needed to dress up their courtyard without compromising on the safety of a passing student. Using Omega 1530, GKD wove metal mesh panels to cover four facades of the interior courtyards. GKD also designed the support structure so that it fit into the existing building structure which was essential for the integrity.
