Weaves: Omega 226
Attachment: Flat & Angle Frame
Architect: Hadi Teherani Architects
Application: Facades
Location: Tehran, Iran
Market Segment: Multifamily

DESCRIPTION

Hadi Teherani Architects led the design of these residences located in Tehran, which served to support a striking design that also protects and provides privacy. GKD's anodized aluminum weave provided lightweight, sustainable coverage that will withstand the rigors of solar rays and redirect wind gusts.
