metalfabrics@gkdusa.com

Weaves: Omega 226
Attachment: Flat & Angle Frame
Architect: Elenburg Fraser
Application: Facades, Solar Control
Location: Melbourne, Australia
Market Segment: Multifamily

DESCRIPTION

Using GKD aluminum fabric, 300 solar protection panels of various widths - some modular - clad the 6,500 square foot surface of this Melbourne apartment building. The metal fabric was anodized in a batch process to create a bronze and gold shimmering effect.
