Weaves: Escalera 7×1

Attachment: Eyebolts

Architect: Dominique Perrault Architecture

Application: Safety and Security

Subsection: Enclosures

Location: Madrid, Spain

Market Segment: Civil

DESCRIPTION

The design of this footbridge features tapering spiral forms of shimmering GKD Escalera metal fabric. The transparent metal mesh surrounds the bridge from end to end in a helical design, a metaphor for the increasingly close association between two parts of the city separated by the river Manzanares.
