Architect: Perkins and Will

Application: Facades, Parking

Market Segment: Healthcare

DESCRIPTION

Providence Cedars-Sinai Tarzana Medical Center has provided care to residents of California's San Fernando Valley since 1973. In addition to heart, vascular, orthopedic, cancer and women's services, the facility boasts the largest Level III Neonatal Intensive Care Unit (NICU) in the area. As the community's needs grew, a new patient wing emerged as a necessity and brought with it the need for an accompanying parking structure. Utilizing GKD's Omega Divergence, the metal fabric defined the overall shape of the building while also allowing for details of the structure to still be visible.
