Weaves: Acoustic Mesh Panels

Attachment: Flat & Angle Frame

Architect: Juan Trinidad

Application: Interior

Subsection: Covering, Partitions

Location: Paris, France

Market Segment: Corporate

DESCRIPTION

The entrance hall of this skyscraper created acoustical challenges with floor to ceiling windows and hard surface walls. Acoustic mesh panels (AMP) were installed noticeably reducing acoustic reverberation in the hall. Meeting areas were also optimized by installing AMP partition walls next to seating areas, virtually eliminating ambient sound.
