Application: Communication, Interior
Subsection: Covering, Etched Graphics
Location: New York, NY
Market Segment: Stadium

DESCRIPTION

Custom GKD Tigris metal fabric was specified for fall guard protection on the balconies and galleries between the entrance and playing field. Tigris 3110 PC and Omega 1505 PC were used to clad walls elevators and stairs as their robust texture makes them resistant to scratches and impacts. The mesh above the elevators was etched with the Yankees logo and coupled with a fabric pattern reminiscent of the team's characteristic pinstripe design.
